BARRIER OPTION PLAN

A Barrier Option Plan (BOP) may be required on large projects in conjunction with an Institutional Control Program (ICP) permit. All projects which require engineered plans, including Planned Unit Development (PUD) and new subdivisions, must include a detailed BOP prepared by a qualified professional (engineer or architect). Information pertinent to the BOP will be on file in the ICP tracking system. At Panhandle Health District's (PHD) direction, the applicant may be required to submit any or all of the following information:

- Name, signature, license number, seal and address of engineer, land surveyor, architect, professional planner, landscape architect, or contractor as applicable, involved in preparation of the permit application or any materials or documents pertaining thereto;
